Technical Business Analyst	R2441	Castleford
<i>Posted Date</i>	<i>Directorate</i>	<i>Closing Date</i>
10/10/2017	Asset Management	24/10/2017

Position

An opportunity has arisen for an experienced Technical Business Analyst to join our Asset Management team.

The Investment, Planning and Delivery Function has responsibility for the construction of the annual asset investment plan and tracking of physical deliverables in support of regulatory compliance for the ED1 period.

This position requires a highly IT literate individual who possesses the necessary skills in structured query language (MS SQL) to interrogate our project management systems and with MS Office to manipulate the results through visual basic.

Prior knowledge of the role is not essential, although this would be beneficial. If you are enthusiastic, confident and possess the necessary IT and analytical skills the rest can be learnt.

Key Responsibilities

The successful candidate will be responsible for;

- Undertaking bespoke data extracts using SQL required to monitor various aspects of delivery of the capital plan
- Supporting the annual regulatory reporting submission in the recording of assets installed and removed in the regulatory period and allocation of the associated costs
- Development of bespoke capital information management metrics
- Assuring delivery of the smart grids element of the capital plan
- Development and control of the electronic templates used in the scheme authorisation and post investment appraisal processes
- Inputting into the fall business planning process
- Authorisation of capital schemes to an individual value of £100k in line with the investment plan
- Producing regulatory forecasts for delivery of the Ofgem secondary deliverables and forecasting delivery volumes based on rate of release of schemes
- Participating in the monthly business review process for the HV/LV delivery units and production of management reports

Key Competencies

- Highly IT Literate
- Strong analytical skills
- Strong decision making skills
- Commercial acumen
- Ability to communicate complex issues and ideas
- Excellent verbal and written skills
