Position

An exciting opportunity has arisen for 2x enthusiastic Control Engineers to join our Control Operations Department.

At Northern Powergrid, our vision is to be the best energy company in serving our 3.9 million homes, whilst delivering a sustainable energy solution. As a dedicated Control Engineer you will be an integral part of achieving this, while always striving to keep our customers power flowing. In this role you will be managing the safe and effective operation of the network up to and including 132kV.

We also offer great benefits such as;

- Car ownership Scheme
- Enrolment into our pension scheme with employer contributions of up to 5% employee and 10% employer.
- 25 days holiday

We're excited to hear from engineers with a passion for the company and a desire to succeed. Apply now and we'll be in touch!

Key Responsibilities

- Managing planned and fault operations and activities on the Northern Powergrid HV and EHV network
- Pursuing safety and customer service excellence
- Being part of a team of technical and qualified engineers working on a shift Rota, coupled with an ability to make decisions and work in demanding situations
- Effecting communications and liaison with field staff, CRC and external stakeholders in planned and reactive situations
- Production and communication of effective and clear reports to line management, other parts of the business and stakeholders

Key Competencies

- Ability to oversee and control operational practice and process between the Control Centre and the operational business
- Ability to work alongside a team of shift engineers and under the shift team managers within the Control Centre
- Competent with DSR and OPM safety rules
- Ability to manage system risk and escalate as necessary
- Ability to prioritise faults from conception to completion liaising predominantly with the local regions.
- Competent in the use of IT systems specifically utilised within the control room arena

Qualifications & Attributes

Essential Qualifications and Experience

- HNC Electrical Engineering
- Technical and protection knowledge of the network
- Good IT skills

Desirable Qualifications and Experience

- Experience as a fully authorised engineer up to and including 132kV and protection systems
- Authorisation and experience on electrical networks up to and including primary system voltage
- Knowledge of Control Operations and its processes
- Knowledge of the Network Access Planning process

ALL APPLICATIONS WELCOME

Please visit our careers website to download an application form and return to us quoting reference number R4495-96. **Please note any applications received without the application form will not be progressed.**

Applications are invited from people with appropriate experience and qualifications. Applicants are considered on the basis of their suitability for the post irrespective of sex, marriage and civil partnership, sexual orientation, gender re-assignment, race, age, disability, religion or belief and pregnancy and maternity.

Northern Powergrid recruit on ability and ability alone.
