

**POWERING
YOUR CAREER**

**Engineer – Operational Delivery
Role Profile**

Engineer – Operational Delivery

Location: Northallerton / York

Directorate: Field Operations

Job Ref No: R5396 / R5397

Do you want to help power your career and be part of an evolving energy industry?

An exciting opportunity has arisen for an enthusiastic Project Engineer to join our Field Operations Team.

The energy industry is advancing with investment in smart technology innovation and Northern Powergrid, as the company responsible for powering everyday life for 8 million customers across 3.9 million homes and businesses in the Northeast, Yorkshire and northern Lincolnshire, is at the forefront of delivering a power network that meets the region's needs, now and in the future.

Our vision is to be the best energy company in serving our 3.9 million homes, whilst delivering a sustainable energy solution. As a dedicated Project Engineer you will be an integral part of achieving this, while always striving to keep our customers' power flowing. You will plan and deliver various LV and HV projects within the zone including Connections, Maintenance (GM/OH), OH Construction and support to the Repairs activity on the electricity distribution network focusing on Safety, Customer Service, Quality & Network Performance

Along with a competitive salary of between £45,943 and £62,828 we also offer great benefits such as;

- Enrolment into our pension scheme
- 25 days holiday
- Able to partake in personal transport provision

We're excited to hear from candidates with a passion for our company and the industry and a desire to succeed. [Apply now](#) and we'll be in touch.

Key Responsibilities

The successful candidate will:

- Experience of operating on an electricity distribution network.
- Delivering a prioritised workload of connections, maintenance or repairs activities.
- Planning and executing projects to time cost and quality.
- Effectively communicating with internal engineering and industrial resource.
- Coordinating external service providers.
- Delivering improved restoration and repairs performance

Key Competencies

- Team working
- Planning and organising
- Time management
- Leadership skills
- Spoken Communication
- Customer Service

Qualifications and Attributes

Essential Qualifications and Experience

- HNC in Electrical Engineering
- Network operations on the LV and HV system
- Construction / maintenance / repair background

Desirable Qualifications and Experience

- SAP authorisations on both overhead and ground mounted systems
- Operational codes on the LV/HV systems
