

POWERING YOUR CAREER

**Operational Delivery Engineer
Role Profile**

Do you have what it takes to play a key role in shaping the electricity distribution network of the future and be at the heart of achieving net zero?

We are Northern Powergrid, and we are responsible for powering everyday life for 8 million people across the Northeast, Yorkshire and northern Lincolnshire. We are a diverse team, creating a smarter, more flexible electricity distribution network that will enable our region to decarbonise and meet the needs of our customers now, and in the future.

The Field Operations team are responsible for delivering technical solutions and projects to ensure the network develops to a smarter, more flexible network that is central to the region's journey to net zero.

This is an exciting opportunity at a time of significant and fascinating change within the energy sector, and distribution networks will be at the heart of achieving net zero. As an Operational Delivery Engineer, you will be an integral part of achieving this.

What will you do?

- Manage and deliver technical projects across the LV, HV and EHV networks to time, cost, quality and safety standards
- Planning and delivery of work, related with various work streams within the region
- Interface with customers as well as internal and external resources to develop and deliver all projects.
- Formally close-out and review delivered projects against business objectives and project success criteria
- Identify opportunities for Northern Powergrid to more efficiently deliver our outputs for customers

What's the package?

Along with a competitive salary of £45,943 - £62,828 we also offer great benefits such as:

- Enrolment into our double-matched pension scheme
- 25 days holiday (rising with service)
- Car allowance / company car scheme
- Payment of professional fees
- Excellent opportunities for career growth.

We're excited to hear from candidates with a passion for our company and the industry and a desire to succeed. [Apply now](#) and we'll be in touch.

Does this sound like you?

- **Team working** is essential in this role. You will be part of a high-performing team delivering technical projects for our customers
- Excellent **Programme** and **Project** Management skills
- **Financial management** and control of costs
- **Deliver quality outputs to required deadlines**
- **Excellent verbal and written skills**, with the ability to effectively communicate with stakeholders from across the business and wider industry
- **Awareness of Safety, Health, Environment** – knowledge and application of all Company and statutory requirements
- **Excellent Customer Service skills and contractor management**

What qualifications and experience should you have?

- HNC, HND, degree, or equivalent in Electrical/Electronic Engineering with at least three years of relevant experience
- Understanding of power system design and operation
- Knowledge of electrical distribution equipment
- Full driving licence
- SAP or AP codes at HV or EHV
- Project management experience
- Knowledge of LV, HV and EHV networks.

What next?
