

POWERING YOUR CAREER

**Project Engineering Manager
– Major Projects
Role Profile**

Project Engineering Manager

Location: Various

Directorate: Field Operations

Job Ref No: R5569

Do you want to help power your career and be part of an evolving energy industry?

An exciting opportunity has arisen for an enthusiastic Project Engineering Manager to join our Major Projects team.

The energy industry is advancing with investment in smart technology innovation and Northern Powergrid, as the company responsible for powering everyday life for 8 million customers across 3.9 million homes and businesses in the North East, Yorkshire and northern Lincolnshire, is at the forefront of delivering a power network that meets the region's needs now and in the future.

Our vision is to be the best energy company in serving our customers, whilst delivering a sustainable energy solution. We are looking for someone who is passionate about communications and can help share our story as we deliver our plans to invest in our network, support net zero and create a greener energy future. You will be responsible for the line management, training and development of project engineers, project managers and contract co-ordinators within Major Projects.

We're excited to hear from dedicated applicants with a passion for engineering and a desire to succeed. Apply now and we'll be in touch!

Along with a competitive salary of between £58,410 - £68,716 we also offer great benefits such as;

- Bonus of up to 10%
- Enrolment into our double-matched pension scheme. Employee contribution 6%, employer contribution 12%
- 25 days holiday (rising with service)
- Car allowance/company car scheme
- Payment of professional fees
- Agile working
- Excellent opportunities for career growth

We're excited to hear from candidates with a passion for our company and the energy industry and a desire to succeed. [Apply now](#) and we'll be in touch.

Key Responsibilities

The successful candidate will be accountable for:

- Effective management and utilisation of resources including Project Engineers and co-ordinators to deliver a wide range of HV & EHV projects
- Effective team management, leadership and supervision of all staff
- Leading the training and ongoing development of team members
- Carryout competency assessments
- Lead on recruitment of new staff
- Develop and improve project management processes and procedures
- Manage the customer service performance of the team
- Accident and incident investigations
- Undertake safety, operational, quality, environmental and business process audits and engagements
- Undertake management projects and key business activities
- Take an active part in the Major Projects management team and liaise the senior leaders from the wider business
- Be able to stand-in for the Head of Major Projects when required
