

# **POWERING YOUR CAREER**

**Engineer - Delivery  
Role Profile**

## **Do you want to help power your career and be part of an evolving energy industry?**

An exciting opportunity has arisen for an enthusiastic Delivery Engineer to join our team.

The energy industry is advancing with investment in smart technology innovation and Northern Powergrid, as the company responsible for powering everyday life for 8 million customers across 3.9 million homes and businesses in the North East, Yorkshire and northern Lincolnshire, is at the forefront of delivering a power network that meets the region's needs now and in the future.

Our vision is to be the best energy company in serving our customers, whilst delivering a sustainable energy solution. We are looking for someone who is passionate about communications and can help share our story as we deliver our plans to invest in our network, support net zero and create a greener energy future. You will be responsible for planning and delivering various LV and HV projects within the Region including Connections, Maintenance (GM/OH), OH Construction, Asset Replacement and Support the repairs activity on the electricity distribution network.

Along with a competitive salary of between £45,943 - £62,828 we also offer great benefits such as;

- Enrolment into our pension scheme
- 25 days holiday
- Personal transport provision

We're excited to hear from candidates with a passion for our company and the energy industry and a desire to succeed. [Apply now](#) and we'll be in touch.
