Matt Ivins	matt.ivins@cleaneartenergy.com
Paul Dunning	paul.dunning@ylemenergy.co.uk
Richard Curtis	richard@verdanteng.co.uk

“Relay Replacement” work - at HV or LV only - undertaken by a Northern Powergrid ALoMCP Recognised Contractor (for the purposes of the ALoMCP) will not require to be Witness Tested by Northern Powergrid. However, there is no requirement to utilise a Northern Powergrid ALoMCP Recognised Contractor to carry out “Relay Replacement” and you may appoint any competent individual and Northern Powergrid will attend to Witness Test the commissioning at no cost to you. The exact date of this would be agreed between yourself and Northern Powergrid.

If the work required on site to achieve ENA EREC G59/3-7 compliance is “Settings Change” only or “Protection Function Deactivation” a Northern Powergrid ALoMCP Recognised Contractor may be able to carry out this work on your behalf. Northern Powergrid will not require to Witness Test at sites where the work to be undertaken is “Settings Change” or “Protection Function Deactivation”.
