

Guide to making an online application

Guide to the online application to connect small scale generation

If you need any more help to complete this form, please contact us:
getconnected@northernpowergrid.com

0845 070 2703 Opening hours: Monday - Friday 8:00am - 8:00pm
Saturday 9:00am - 5:00pm

The multiple premises connection procedure is for the installation of single or multiple SSEGs connected in parallel with the Northern Powergrid Network, within a number of customer installations and in a close geographic location. Connection of the SSEGs is only allowed after the application to connect has been approved and any works facilitating the connection are complete.

Confirmation of the commissioning of each SSEG system will need to be made no later than 28 days after commissioning.

In accordance with ESQCR Regulation 22(2)(c) the installer is to ensure that the DNO is made aware of the SSEG installation within 28 days of the time of commissioning.

Failure to comply may lead to the disconnection of the customer's installation or failure of the SSEG to operate as intended.

HELP WITH SECTION 1 LOGIN OR REGISTRATION

If you have used our online connections services before, please login using your email address and password.

Don't worry, if you have forgotten your password we can help you to reset it, just click on the 'forgotten your password' link.

If this is the first time you have applied online please register to create an online account.

HELP WITH SECTION 1a REGISTRATION

Please provide your full correspondence address including any street number and your full postcode. It is often easier to contact you by email or mobile phone. Please provide these details if you are happy for us to contact you via these methods.

HELP WITH SECTION 2 INSTALLER DETAILS

For each notification, we will provide you with a unique Northern Powergrid reference number.

If you have multiple notifications with us, you may want to provide a different reference for each. This will help with identifying each one if we need to discuss them with you.

You need to provide us with the details of the SSEG installer. If these details are the same as the ones used when creating your online account then please select 'Use my contact details'.

HELP WITH SECTION 4 SSEG DETAILS

Note that only technologies with a type tested equipment can be installed under G83/2.

The maximum aggregate capacity, new and existing, of the SSEGs installed in a single customers installation under G83/2 is 16Amps per phase at 230V AC.

For each premises you need to provide us with the primary energy source (e.g. wind, solar, hydro, gas CHP), the maximum export capacity in kW and Amps and the addresses, including full postcode of the premises where you are requesting approval to connect the installations.

If you are proposing to limit the export to a figure lower than that of the SSEG, provide the rating of the inverter for each installation.

To ensure we can assess the full impact your connections may have on our network we need to know when you are proposing to complete the installations.

To enter details for subsequent premises, use the copy facility, and amend any of the necessary information, e.g. site number, mpan number

Premises Details
STEP 2 of 3

* Signifies mandatory fields

How many premises are you proposing to connect generation at? *
Please provide address details of each premises
All premises must be within 500m of each other (for example NE3_3RE_NE1_3RF)
If this is not the case, please create a separate application for all postcode groups, or contact the connections team to discuss.

HELP WITH SECTION 5 YOUR SITE PLAN

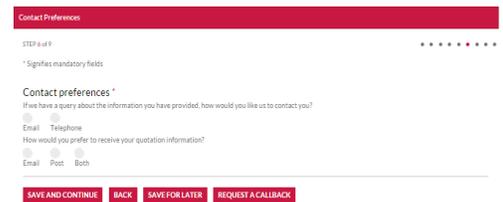

You must provide the general location of your proposed installations using the mapping tool.

Please upload a plan which indicates the location of each property highlighted.

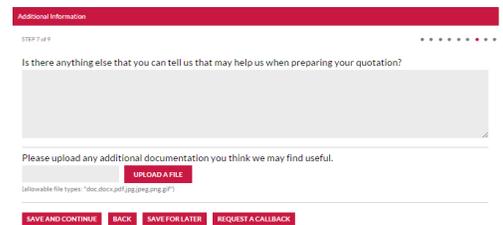

HELP WITH SECTION 7 CONTACT PREFERENCES

It is often easier to contact you by email or mobile phone, but it is your choice. Please tell us how you would like us to contact you if we have a query and how you would like to receive your quotation.

HELP WITH SECTION 8 ADDITIONAL INFORMATION

Please let us know if there anything else that you can tell us that may help us when preparing your quotation, and if you have additional documentation that may assist us then upload this here.

HELP WITH SECTION 11 Review and submit

Please check that all the information you have entered is correct. If you are happy with your answers then submit your application.

What happens next?

We will check your submission and contact you if we need to confirm any of the information you have provided.

We will update your online account with the name and contact number of the designer who will prepare your approval to connect.
