

POWERING YOUR CAREER

Design Engineer HV & LV

Role Profile

Do you have what it takes to play a key role in shaping the electricity distribution network of the future and be at the heart of achieving net zero?

We are Northern Powergrid, and we are responsible for powering everyday life for 8 million people across the North East, Yorkshire and northern Lincolnshire. We are a diverse team, creating a smarter, more flexible electricity distribution network that will enable our region to decarbonise and meet the needs of our customers now, and in the future.

The **Connections Design Team**'s vision is to design connections solutions to directly enable our customers and region's journey to net zero and wider economic growth.

This is an exciting opportunity at a time of significant and fascinating change within the energy sector. As a **Design Engineer (HV & LV)**, you will play an integral role.

What will you do?

- Produce complex electrical design work for customer driven schemes against guaranteed standard deadlines
- Preparation of the supporting documentation seeking authorisation of high voltage (HV) and low voltage (LV) customer driven projects
- Provide design support to other departments within the Engineering Directorate engaged in the strategic development of the network
- Complete the post acceptance elements of customer driven work, including direct negotiation with developers' representatives
- Deal directly with representatives of stakeholders
- Assist with policy development

What's the package?

Along with a competitive salary of £45,943 to £62,828 (dependent on experience), we also offer great benefits such as:

- Enrolment into our double-matched pension scheme
- 25 days holiday (rising with service) plus bank holidays
- Car allowance / company car scheme
- Payment of professional fees
- Bonus scheme
- Excellent opportunities for career growth

Does this sound like you?

- **Team working** is essential in this role to develop and implement new solutions. You will be part of a high-performing team, delivering for our customers
- Confident **decision-making skills**
- Excellent **technical knowledge**, which combined with your broader knowledge of the wider industry will ensure our network develops and supports decarbonisation in a smarter, more flexible way
- **Problem solving** is a must when faced with the scale and pace of change facing us, not to mention the number of exciting challenges and level of innovation required
- **Deliver quality outputs to required deadlines**
- **Excellent verbal and written skills**, with the ability to effectively communicate with stakeholders from across the business and wider industry

What qualifications and experience should you have?

- Level 5 or 6 (HND, degree, or equivalent) in STEM subject, or a level 4 qualification (e.g., HNC) with at least three years of relevant experience
- Understanding of power system design and operation
- Knowledge of electrical distribution equipment
- Full driving licence

What next?
